

REVOLUTION H2H

The Patent Pending H2H pump is the world's first hydraulic powered hydraulic torque wrench pump. Because it is hydraulic powered and mechanically operated, there are no electrical components that cause sparks or other ignition sources. The H2H pump eliminates generators, extension cords, circuit boards, plugs, fuses or electrical remote switches. Because it will not create ignition sources, the H2H pump can be located right next to the work area which drastically increases hydraulic wrench speed by allowing for the use of short high pressure twinline hoses.

SAFE

- Eliminates need for electrical generators
- There is no electrical system and no way to cause sparks
- Pump is made entirely from non-sparking stainless steel
- Has a unique non-sparking control cable
- Comes with stainless steel tank

LIGHTWEIGHT

72.4 lbs with oil

QUIET

- Only 82 dB - less decibels than pumps with universal motor
- Faster and quieter than electric pumps

RUGGED

Corrosion resistant stainless steel roll cage

UNIVERSAL

Requires a minimum of 2000 psi and 4 gpm

* Patent Pending

Feature	Imperial	Metric
Reservoir Capacity	1 gal	3.75 liters
Maximum Operation Pressure	10,000 psi	700 bar
Sound Level	82 dB	82 dB
Weight	72.4 lbs	32 kg
Length	20.75 in	52 cm
Width	10 in	25 cm
Height	16.75 in	42.5 cm
